Re: Project: Career Exploration for the Graduation Project

Final Presentation Date: September 30 2011

The project that I have selected to do as my senior project is the Career Exploration. This project fits under the category of personal interest, of the senior graduation project. I will be job shadowing many different careers and visiting many different colleges. The careers I will be shadowing will be, a veterinarian, a councilor, a physical therapist of some sort, and possibly another job shadowing opportunity in the hospital. Job shadowing all these different kinds of careers will give me an idea on how it is to work in the medical field, this is because I am aiming to become a veterinarian. The colleges I plan on looking into will more than likely be close to home, like Mansfield, Corning, Elmira, and possibly another. At the very end of this project, I will be able to show notes, powerpoints, pictures, and possibly even videos of my job shadowing and college visits.

I understand that all the work on my graduation project must be my original work. I will properly cite all my sources used in accordance with school district guidelines. I am aware that any irregularities will be taken before the graduation project Assessment Panel, and /or my Principal for review. Any plagiarism will invalidate my project and jeopardize my graduation.

Regards,
